On November 11, 1988, police discovered 7 bodies buried in Dorothea Puente's yard. Like Shakespeare's Richard III, *Dorothea Puente Tells All!* shows the rise and fall of an engaging and crafty villain who believes the audience is on her side. Mrs. Puente never stopped maintaining her innocence and some never stopped believing her. In unraveling the truth of Dorothea Puente, this play also shows the rest of us something about our own needs and vulnerabilities, and how we can protect ourselves from people who would exploit us.
